Digital Twin of your IT & OT network

Dr. Tim Senn
28.11.2023

<https://narrowwin.ch>

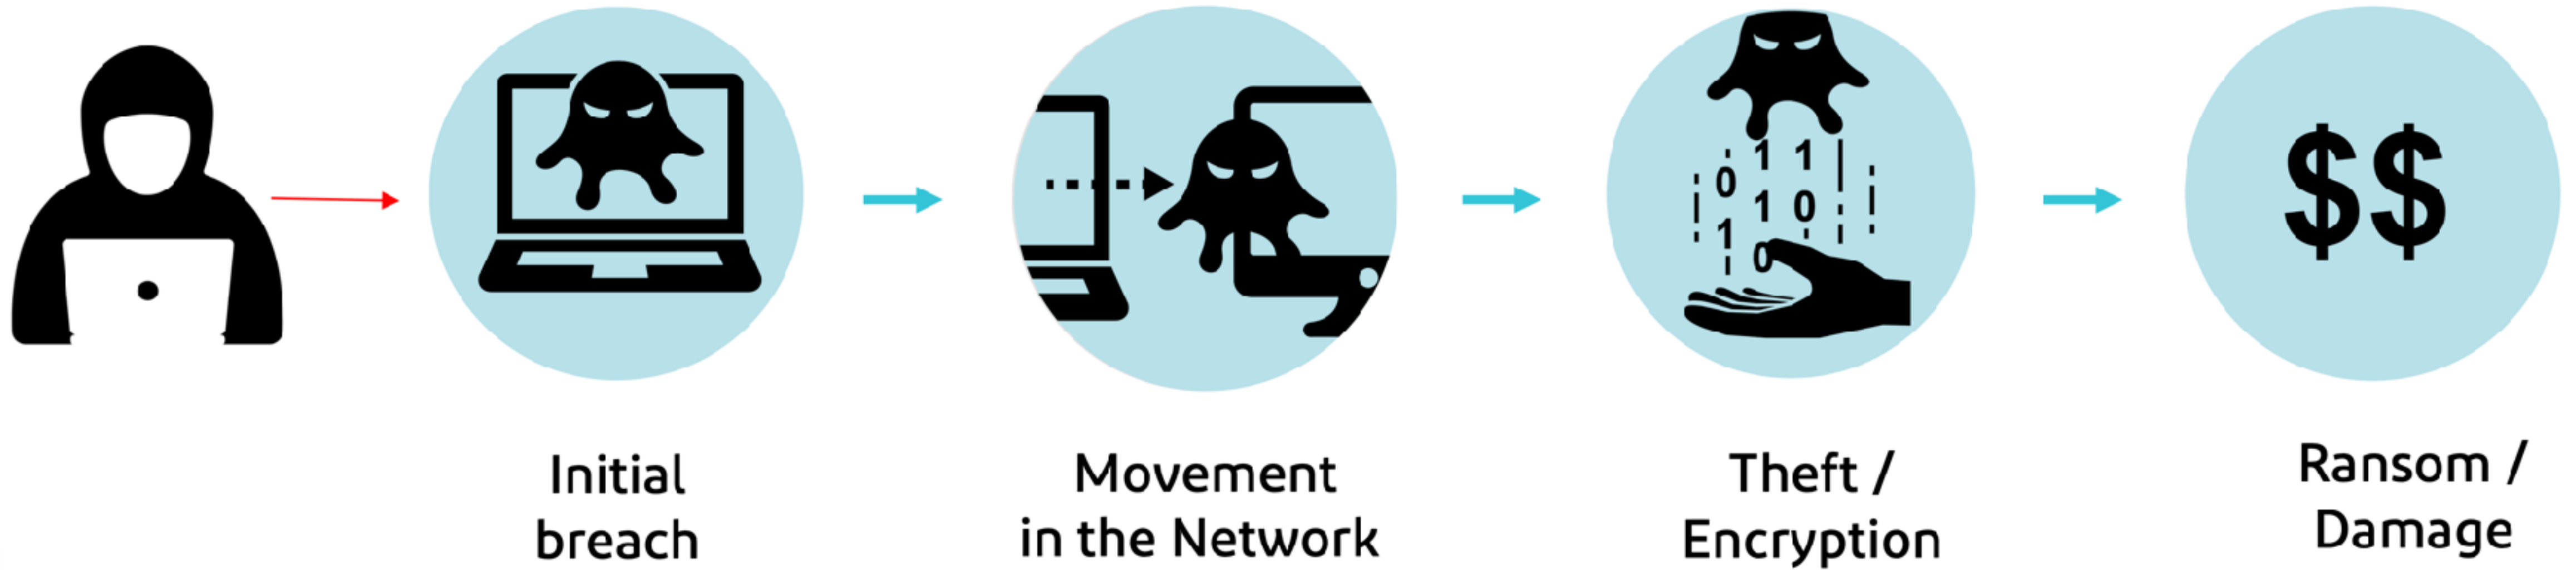

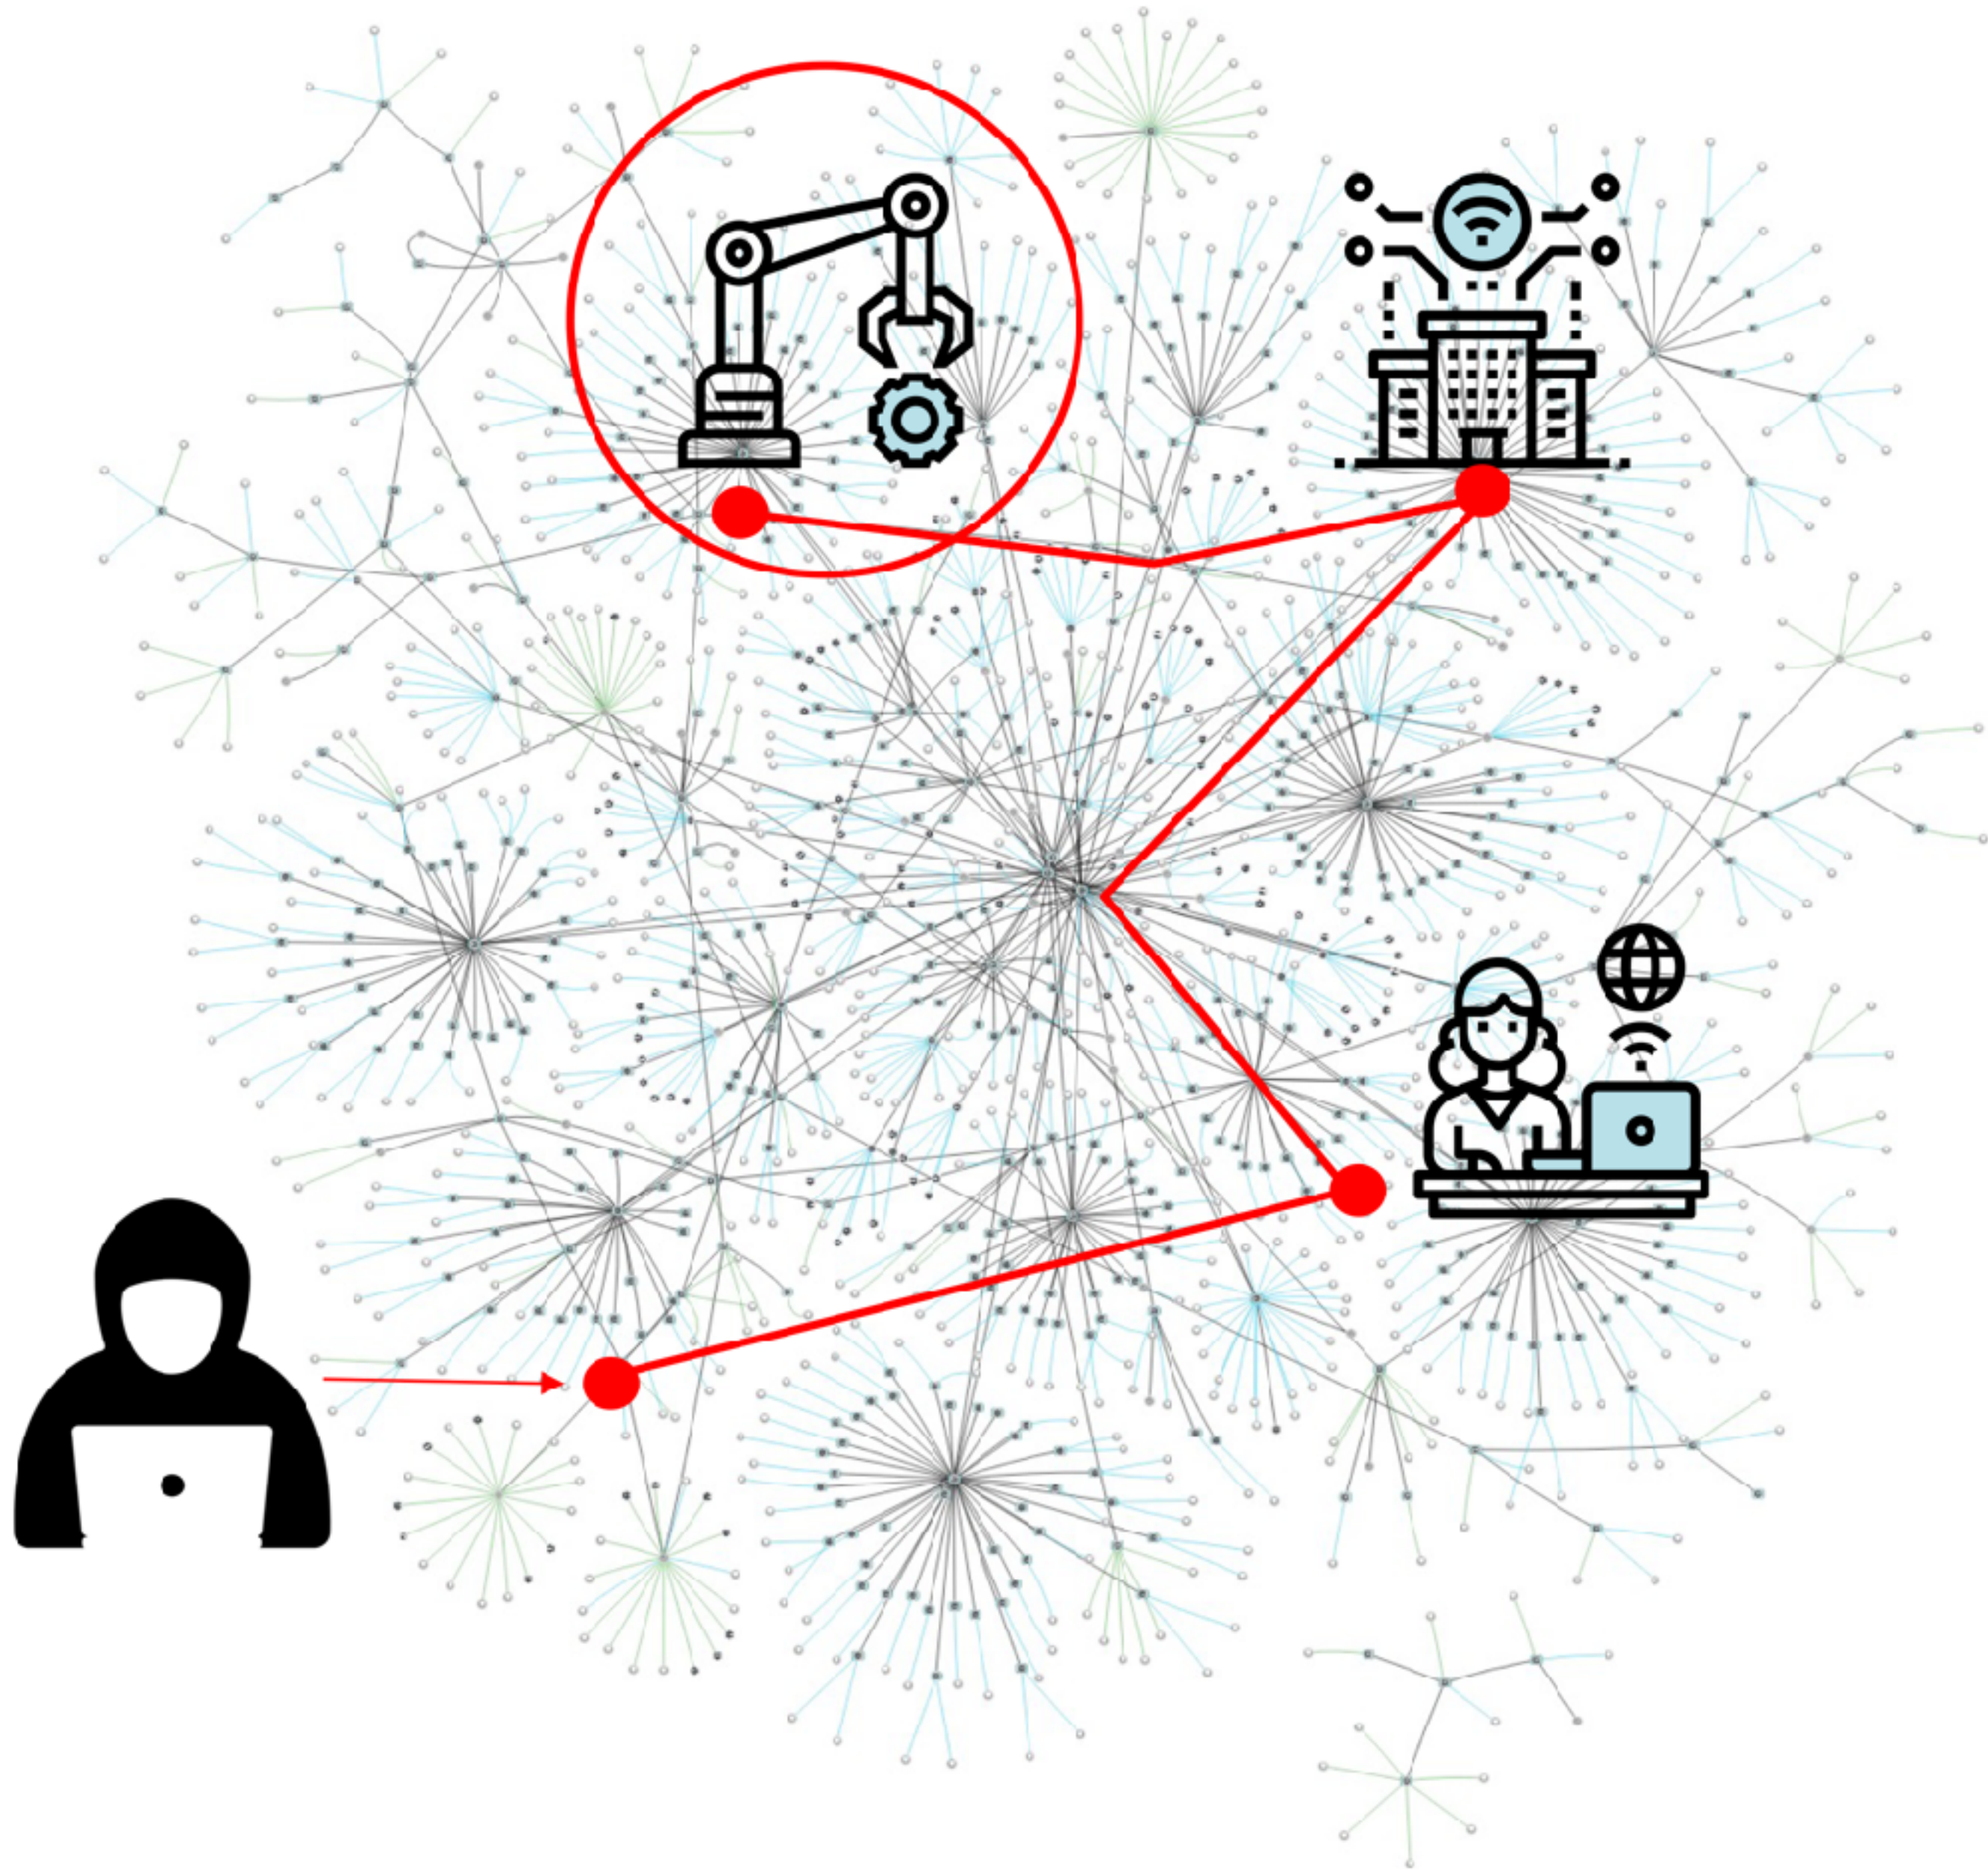

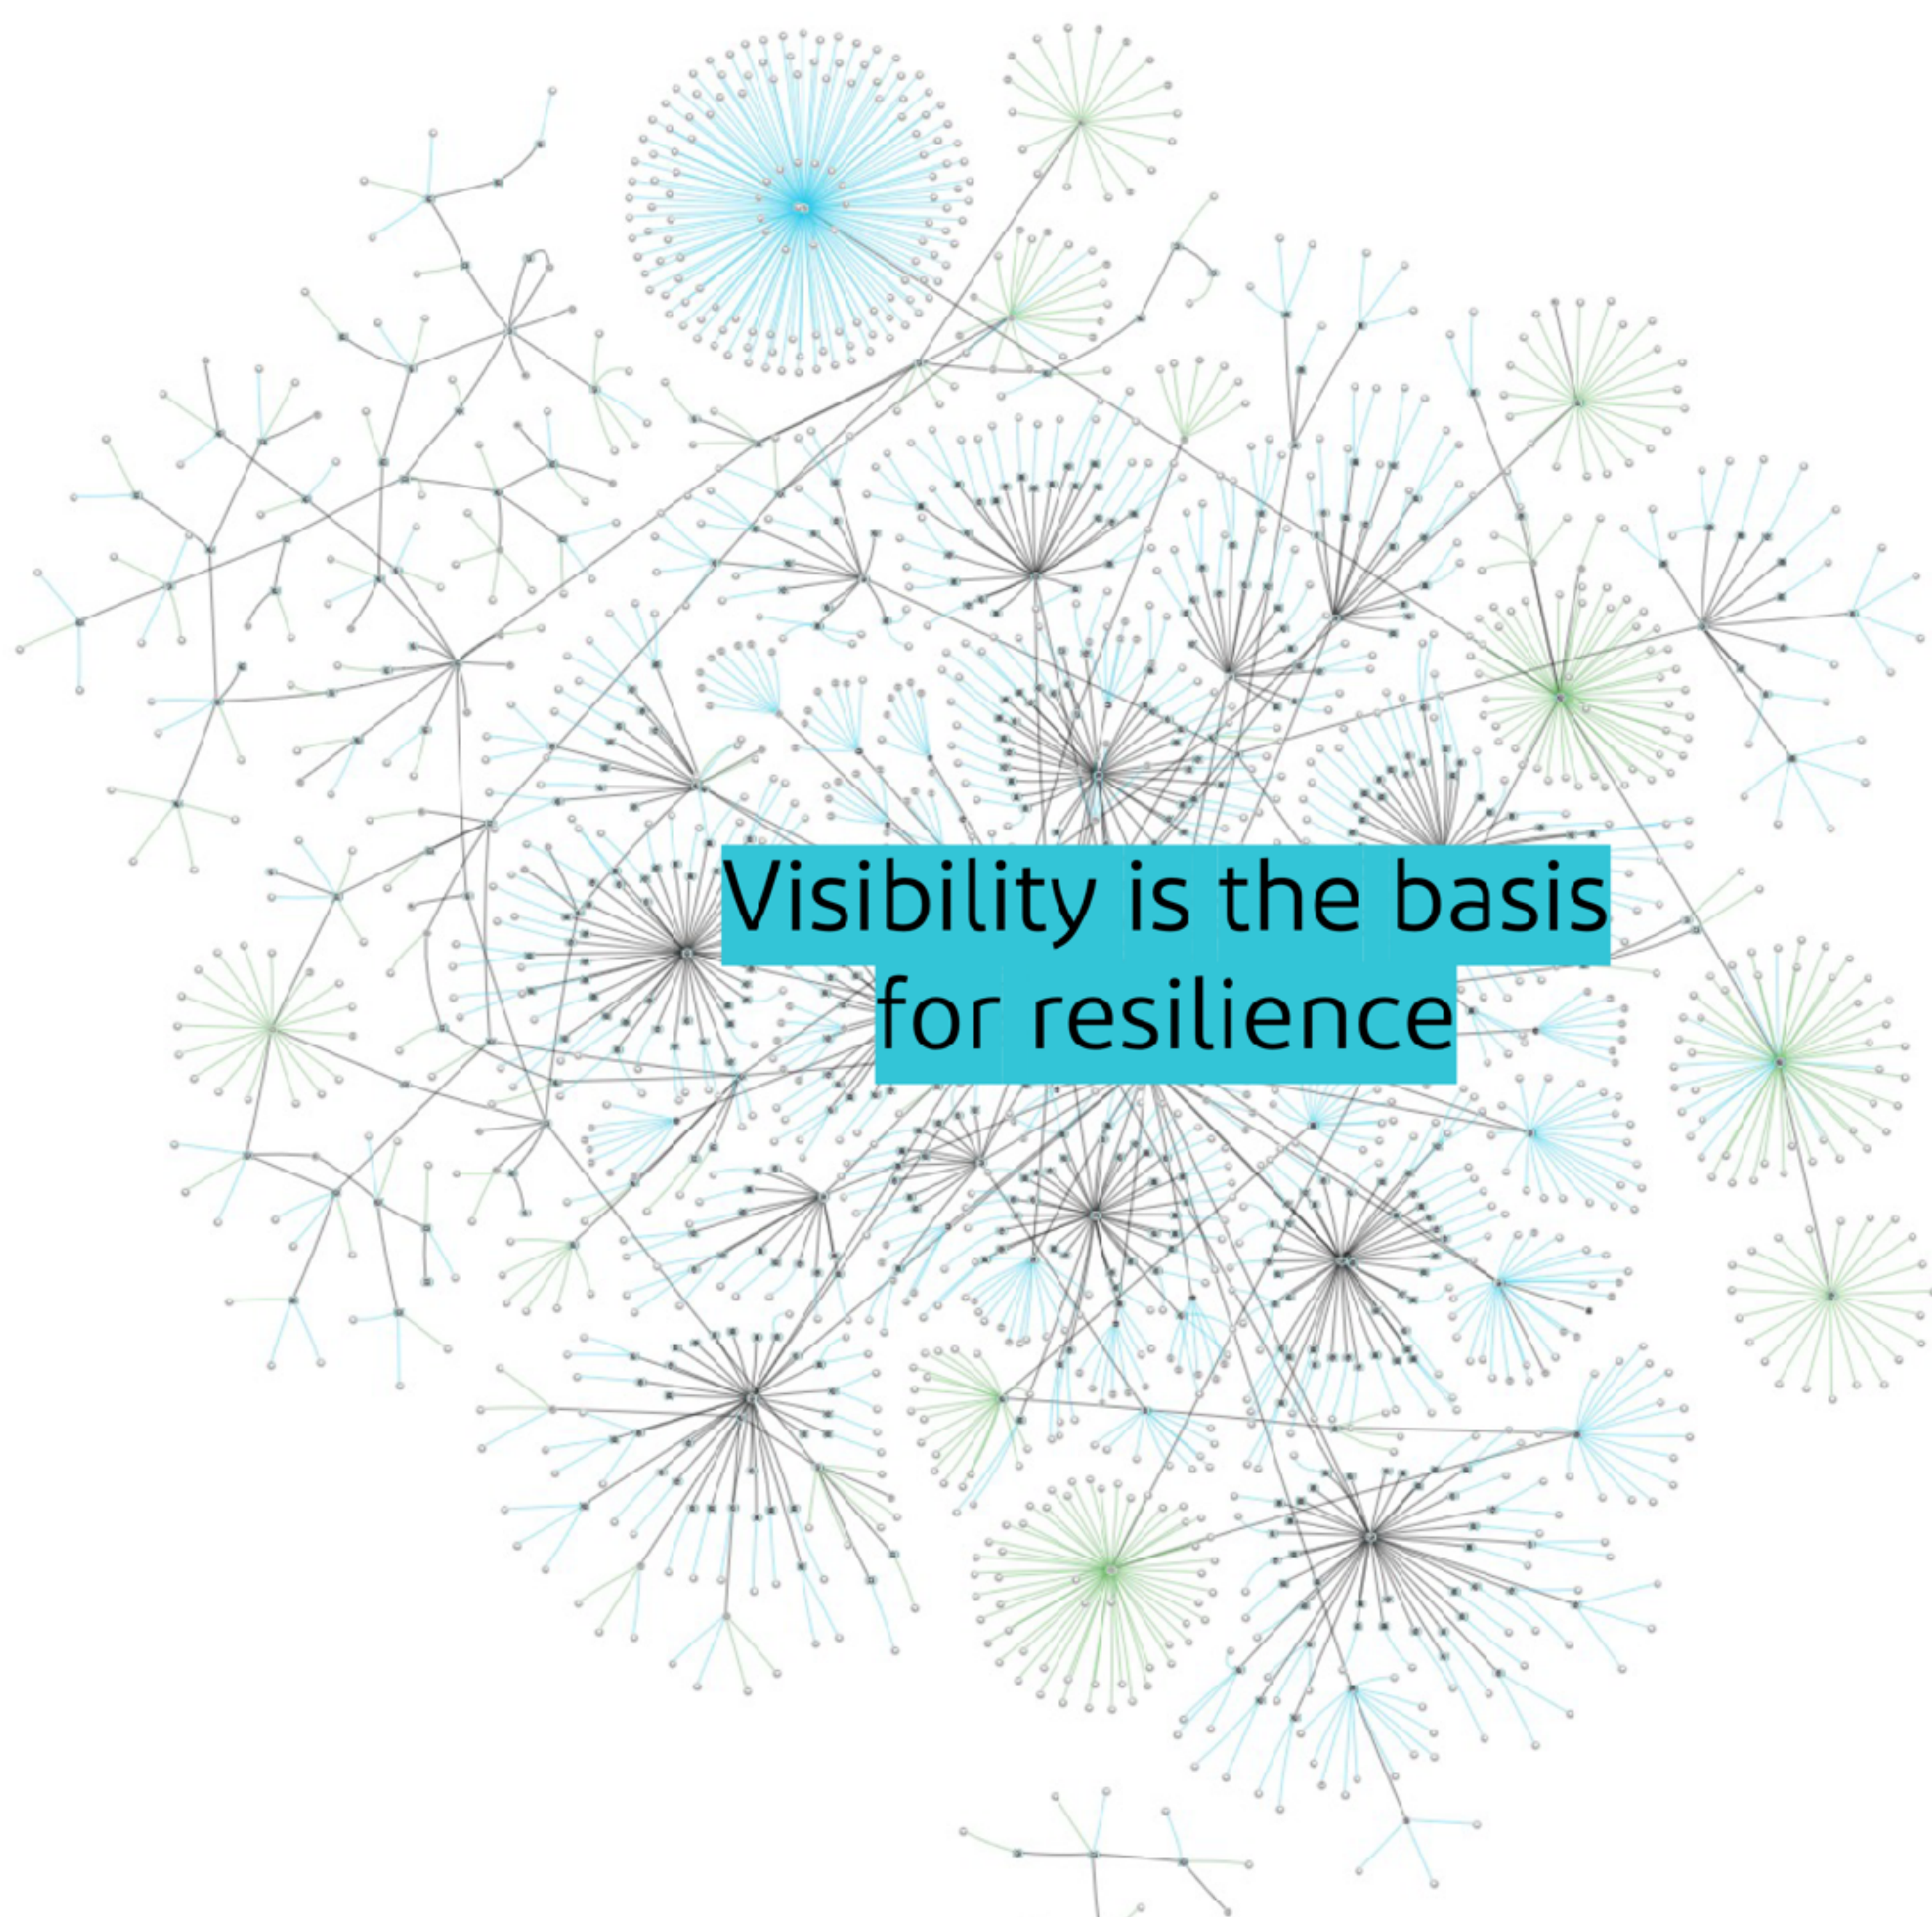

Computer networks are fragile constructs

- Historically grown
- IT environments and Research/Production (OT) environments connected
- Lab Equipment, ICS, IoT, Servers, Computers etc.
- Business critical

Attackers move from vulnerable device to device

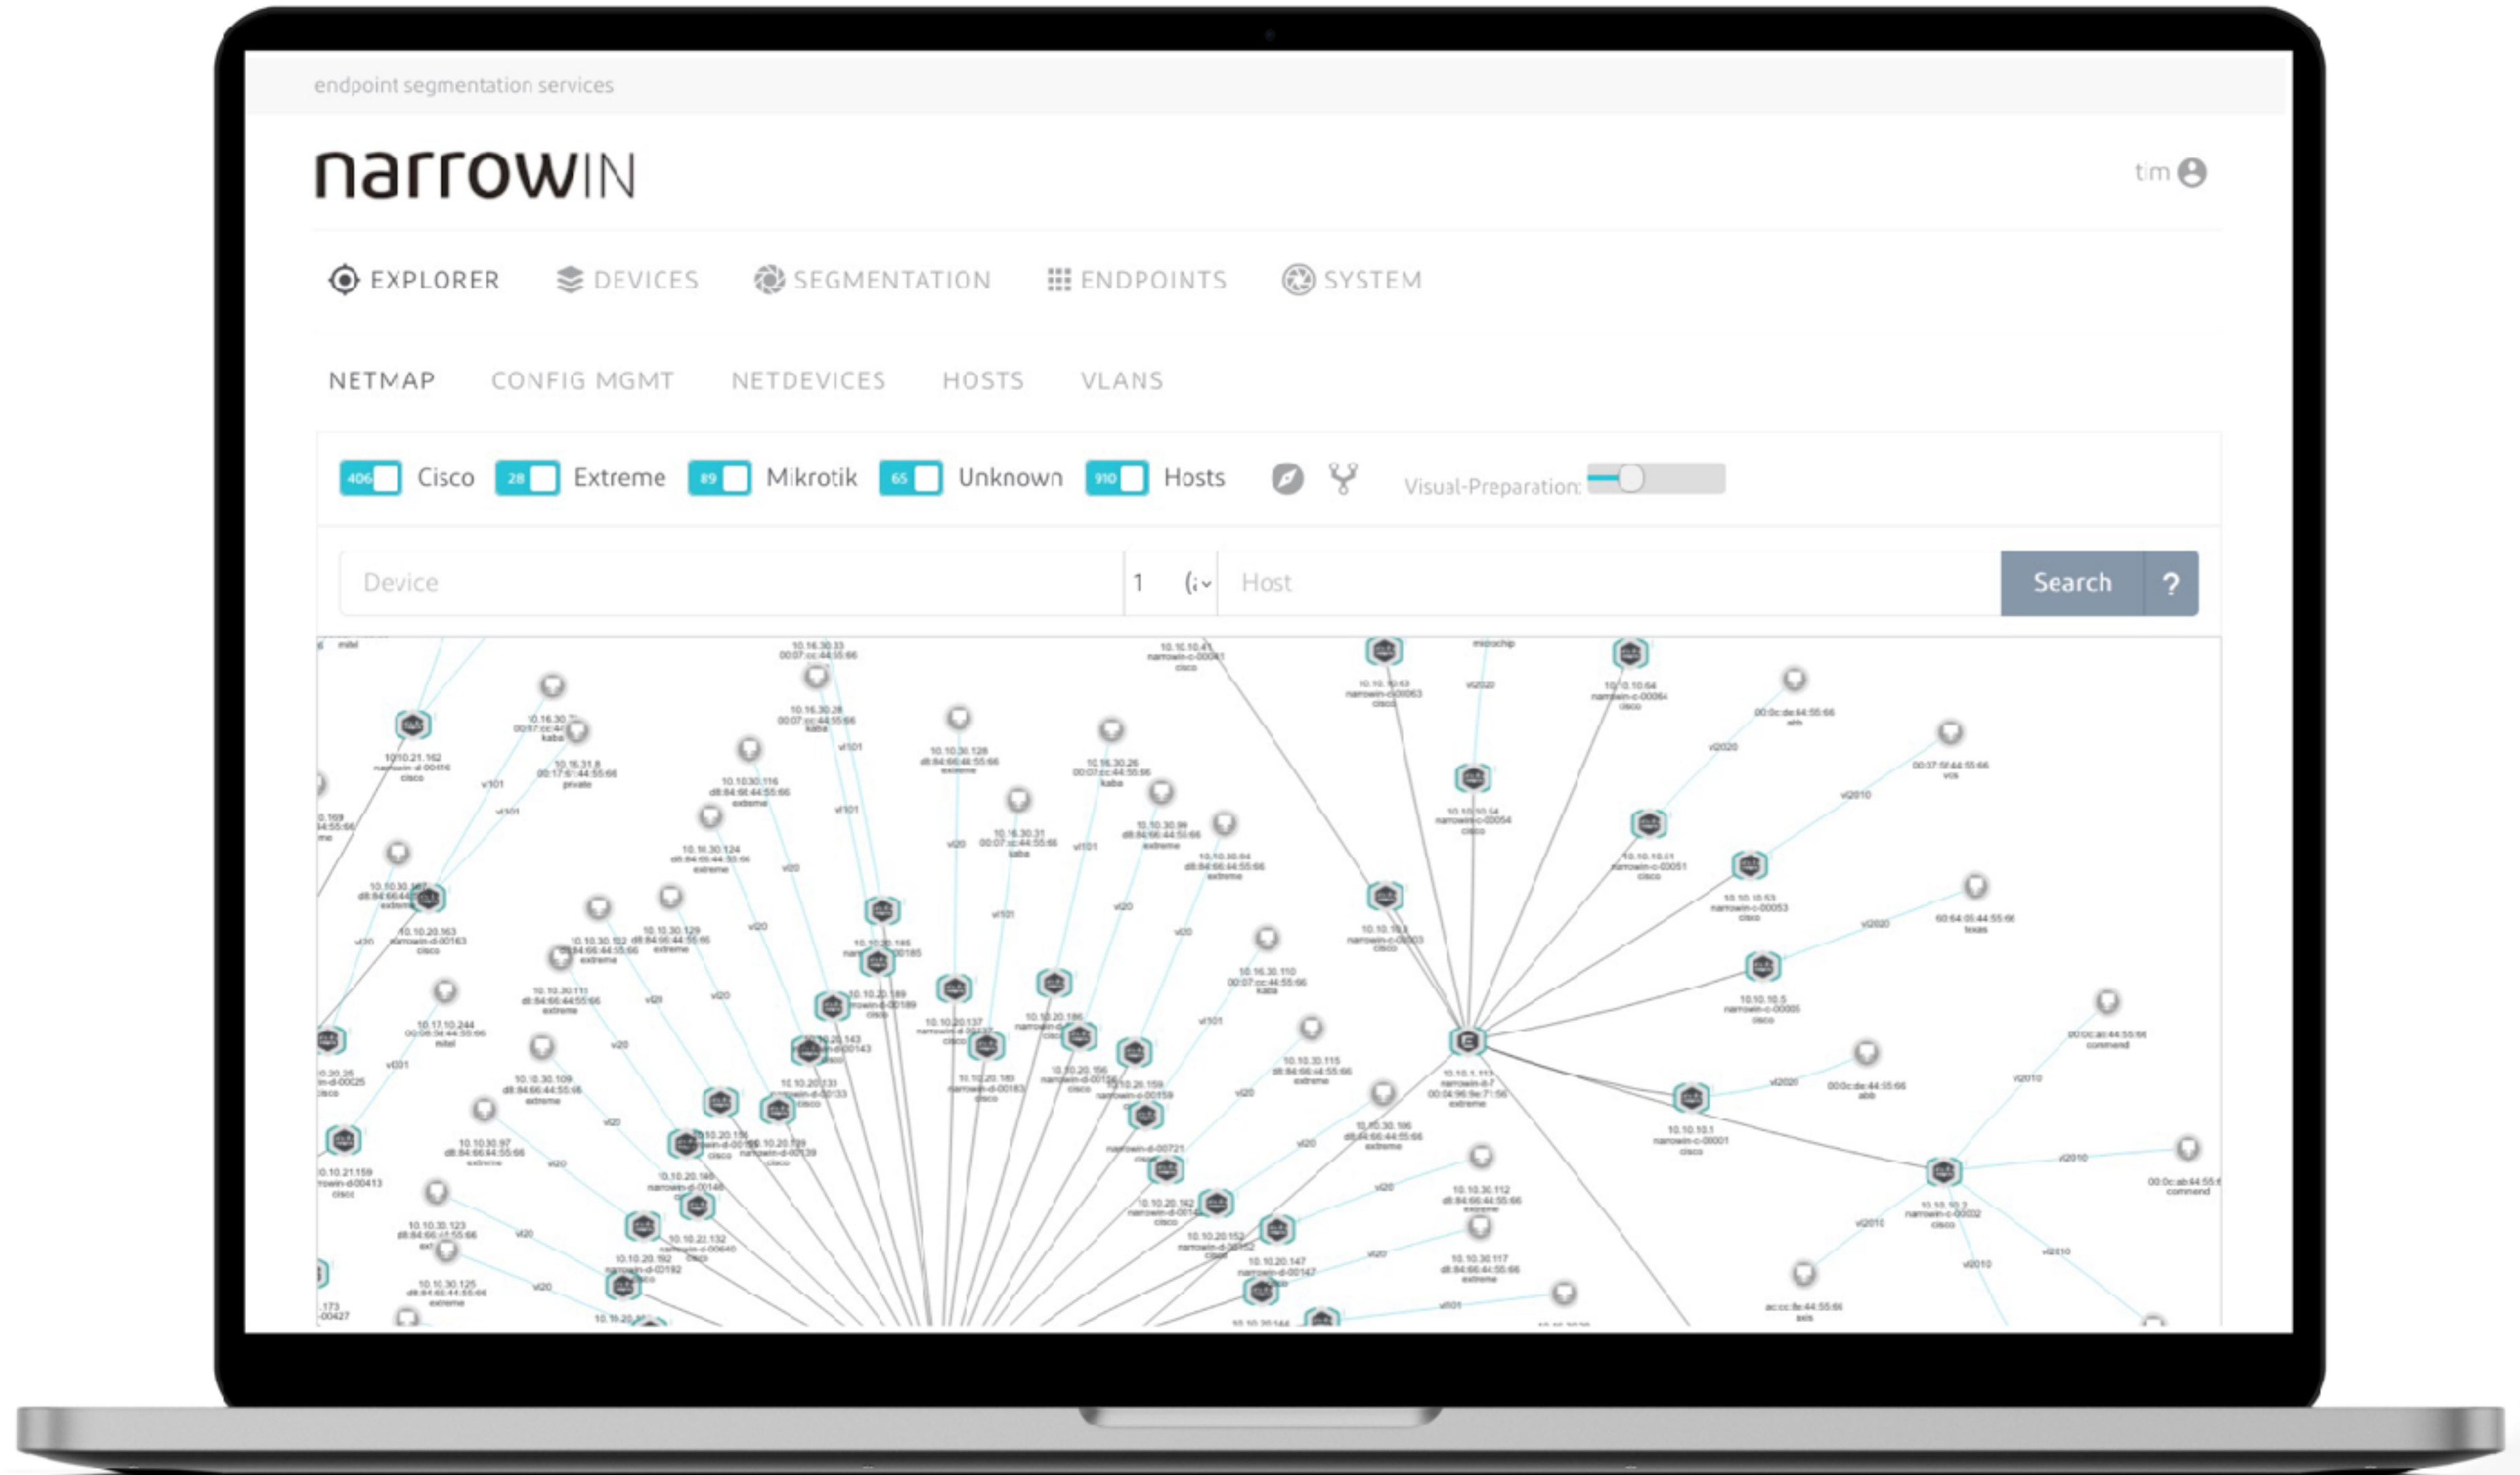

Visibility is the basis
for resilience

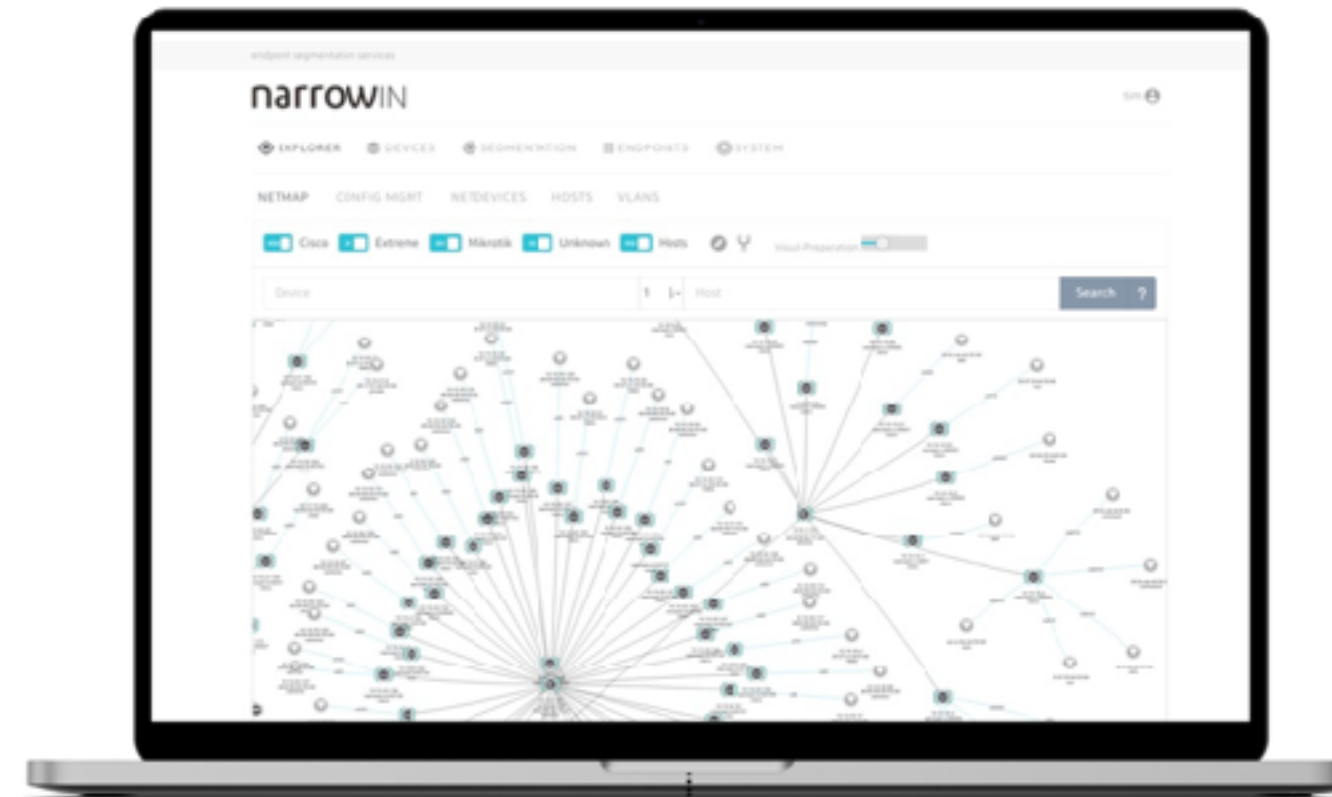

Digital Twin of the IT, OT & IoT Networks

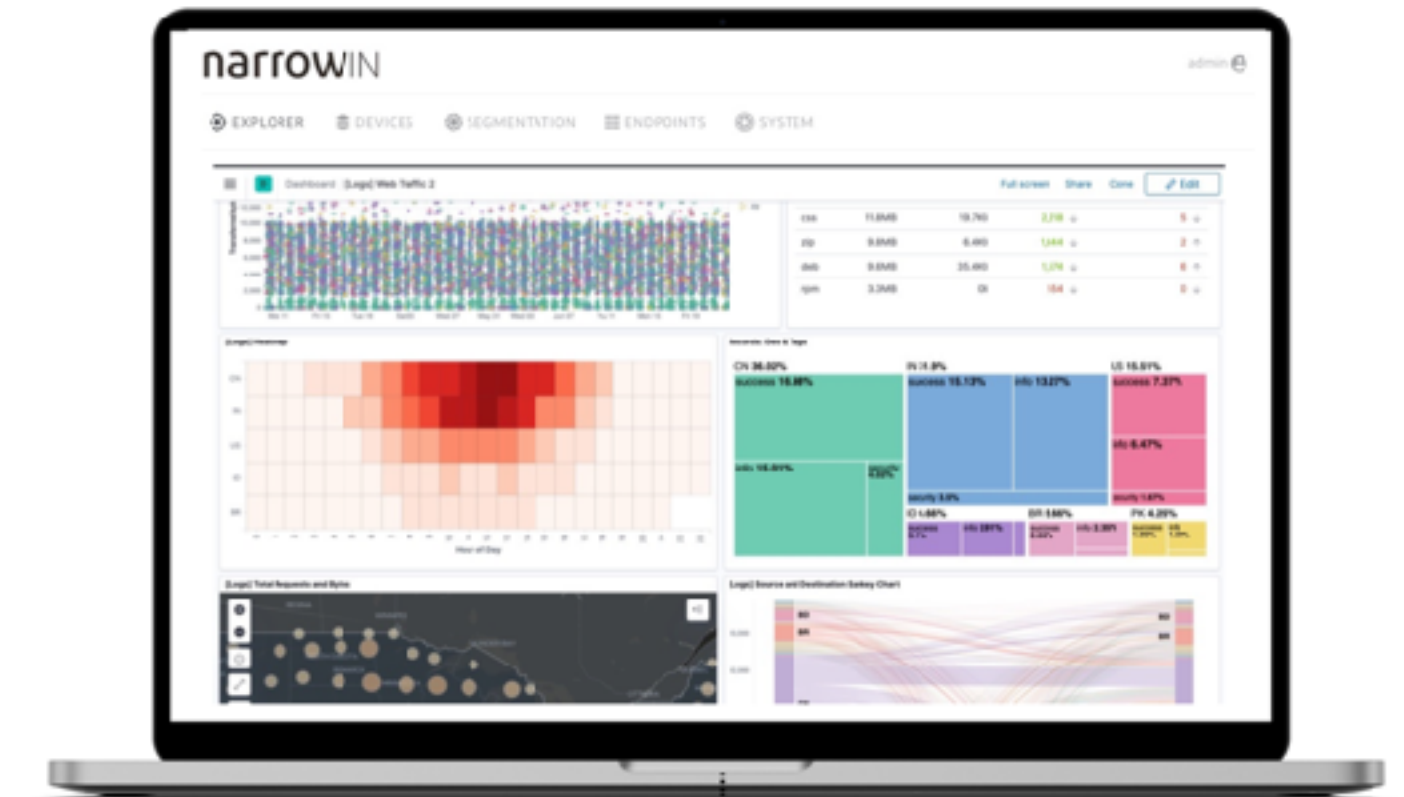

Fully automated „Data Journey“

1.) Crawler

2.) Digital Twin

3.) Intelligence

It's not just about security, it's also about availability

Automation can save a looot of time (i.e. money)

You don't need the cloud for this :)
